## POWERBLOCK CARE AND MAINTENANCE

1. Do not drop the PowerBlock. Dropping Classic Sets from a height of more than 6 inches will void the warranty.

Dropping an un-nested weight selection from any height could result in permanent deflection of the unit and will void the warranty.

2. Should any weld break, stop using the PowerBlock immediately and see warranty instructions.

**CAUTION:** Use of PowerBlocks with any cracked or broken weld could result in falling weights and/or injury.

3. Inspect equipment daily for loose or worn parts (including bolts). Replace worn parts at first sign of wear. Failure to replace worn parts may result in injury. Tighten loose bolts.

4. Apply "Armor All" to painted weight plate assemblies (do not apply over band on side rails)  
This will remove cosmetic scratches and serve as a lubricant for nested assemblies.

5. If Paint chipping does occur as a result of normal use, black liquid paint can be used for touch-up. As a result of shipping or extended use the nesting of the weight plates may cause some scuffing of the powder painted finish. Use of an "Armor All" type product will help restore this condition and provide the best performance.

# SAFETY FEATURES AND PROPER USE

1. Removing or replacing the handles and weight from the nest must be done from a straight motion (see figure 1). Turning the handle sideways may jam the assembly. When removing any amount of weight from nested assembly (See figure 2), always check to insure that the weight selection pin is fully engaged beneath the lowest suspended weight. Lift handle and weights five (5) inches above the nest and visually inspect for correct placement of weight selection pin. If pin is improperly located, return weighted handle to nest and correctly insert weight selector pin.

**CAUTION:** Do not use if weights are jammed. Using while jammed may result in falling weights and/ or injury.

2. Lift from handle only (see figure 4)

**CAUTION:** Lifting from any other part of the PowerBlock may result in falling weights and/or injury.

3. The weight selection pins contain magnetic blocks. Make sure the magnetic blocks contact the round side rails. See figure 2 and figure 3 for correct and incorrect magnetic block and weight selection pin orientation.

**CAUTION:** If the magnetic blocks disengage from the side rails (figure 3), stop use immediately. Place PowerBlock on nearest flat surface and fully engage magnetic blocks to side rails. Failure to maintain full and correct contact (see figure 2 & 3) between magnetic blocks and side rail may result in weights falling and/or injury.

4. Your Powerblock features tether cords (see Figure 2 & 3) that will prevent the selector pin from being misplaced. The tether cord also serves as a safety retainer for the weight selector pin in the event the magnetic blocks ever lose contact with the side rails.

**CAUTION:** Do not use PowerBlock without tether cords being in good working condition and attached to the top side rail and weight selector pin. Weight selector pin may fall out of PowerBlock if used without tether cord and may result in falling weights and/or injury.

5. Do not bang PowerBlocks together during any exercise, any contact between a PowerBlock and another PowerBlock or a piece of equipment or a body part could result in the selector pin(s) dislodging.

**CAUTION:** Banging PowerBlocks could dislodge pins and result in falling weights and/or injury.

7. Your PowerBlock is available with an optional PowerBlock Stand. For ease of weight selection and convenience the PowerBlock stand is highly recommended. If the stand is used on hardwood floors, place a rubberized mat under the stand base to prevent damage to your floors. Stand mats available online [www.powerblock.com](http://www.powerblock.com)

**CAUTION:** Do not allow children or minors to use or play with the PowerBlock Stand. Falling weights can result in injury or damage.
