Safety Features And Proper Use

1. Removing or replacing the handle and weights from the nest must be done in a straight motion. (Image 1)
2. Turning the handle sideways while lifting may jam the assembly. (Image 2)

DANGER

Do not use if weights are jammed. Using while jammed may result in falling weights and/or injury to you or others around the weights.

3. The weight selector pins contain magnetic blocks. Make sure the magnetic blocks contact the round side rails. The selector pin should be horizontal and fully engaged securely to the side rail of desired weight. (Image 3). Be careful not to cross pin (image 4).

WARNING

Always check the selector pin to make sure it is fully inserted and completely engaged before lifting the dumbbell to avoid injury (Image 3). If the selector pin disengages from the side rails, stop use immediately. Place PowerBlock on the nearest flat surface and fully engage selector pin magnetic blocks securely to the side rails. Failure to maintain full and correct contact between magnetic blocks in selector pin and side rails may result in weights falling and/or injury. Do not use the PowerBlock without the tether cord being in good working condition and attached to the top side rail and selector pin. Weight selector pin may fall out of PowerBlock if used without tether cord and may result in falling weights and/or injury.

4. Your PowerBlock features a tether cord which attaches the selector pin to the weight plates on the #1 or top most weight plate side rail. The tether cord will prevent the selector pin from being misplaced. The tether cord also serves as a safety retainer for the weight selector pin in the event the magnetic blocks ever lose contact with the side rails.

Safety Features And Proper Use

5. Lift from center grip of handle only (Image 5).
6. Do not strike PowerBlocks together during any exercise. Any contact between a PowerBlock® and another piece of equipment or a body part could result in a selector pin dislodging.

DANGER

Lift from center handle only. Lifting from any other part of the PowerBlock may result in falling weights and/or injury. Striking PowerBlocks could dislodge pins and result in falling weights or injury.

7. Lift the handle and weights above the nest and visually inspect for correct placement of the weight selection pin. (Image 5)
8. To insert or remove adder weights, open adder weights lock by moving it to the left and down (image 6). Close by moving to the right and up (image 7).

9. Because the Adder Weights slide in/out easily, be sure to place your hand in front of the handle when unloading Adder Weights.
